Comments:

- Alec is a great TA and is super helpful in explaining things and teaching us ways to learn and grasp the material better
- Alec is literally my favorite TA. I pretty much live at his office hours because he is really friendly and amazing at explaining the material we're learning in class. Even though he has advanced chemistry knowledge, he's able to translate the material to his students in ways that you can understand. I've been going to him for chemistry help for both che 106 and 116 since he taught for both professors I've had this year. He deserves like an award or something because I would go to his 3 hour office hour last semester and ask him like a million questions for the full 3 hours. I wish that he could be the TA for all the chemistry classes I have to take.
- Alec is super friendly and always willing to help us out with chemistry! He really cares that his students understand the material! Awesome TA.
- Alec was a fantastic TA. He was clear and got to the point but also made it clear that he would spend as much time as needed helping us. I think he was better at explaining topics than Dr. French
- Alec was really nice and actually gave some great examples to help reinforce what we were learning.
- Awesome guy
- Great TA, was very good at answering questions.
- Having to go to recitation is pretty annoying, so I liked that Alec had timers for us so that we could get through the whole worksheet and practice the material but not waste time sitting around waiting for the TA to begin teaching as has happened with courses I've taken previously.
- He did a great job of explaining the material and giving tips/tricks for some of the tougher problems!
- He was very knowledgeable and was always willing to help us understand the material
- I hope Alec decides to become a professor.
- None
